1. Introduction

The purpose of this User Manual (UM) is to provide AFMA members with the necessary information to utilize the AFMA Stats system effectively when submitting their monthly Salmonella information.

1.1 Overview

The AFMA Stats system is organized into the following distinct modules:

1. Feed Sales
2. Industry Profile
3. Salmonella

The monthly submissions made by AFMA member companies through the AFMA Stats system are highly valuable and play a pivotal role in developing robust feed industry statistics that provides industry information regarding manufacturing, sales, and contamination trends observed. The data submitted via the AFMA Stats system creates a benchmarking platform for the feed industry and supports liaison and collaboration initiatives with the government and other agricultural value chain partners. The company data is accessible to the relevant participating AFMA members (password protected), and the overall reports are published annually in the AFMA Chairman's Report.

2. Getting Started

2.1 User Access to the AFMA Stats System

Users can gain access to the AFMA Stats system via the following website located at https://www.afmastats.co.za.

AFMA members can log in using their personalized **Username** and **Password** (Figure 1).

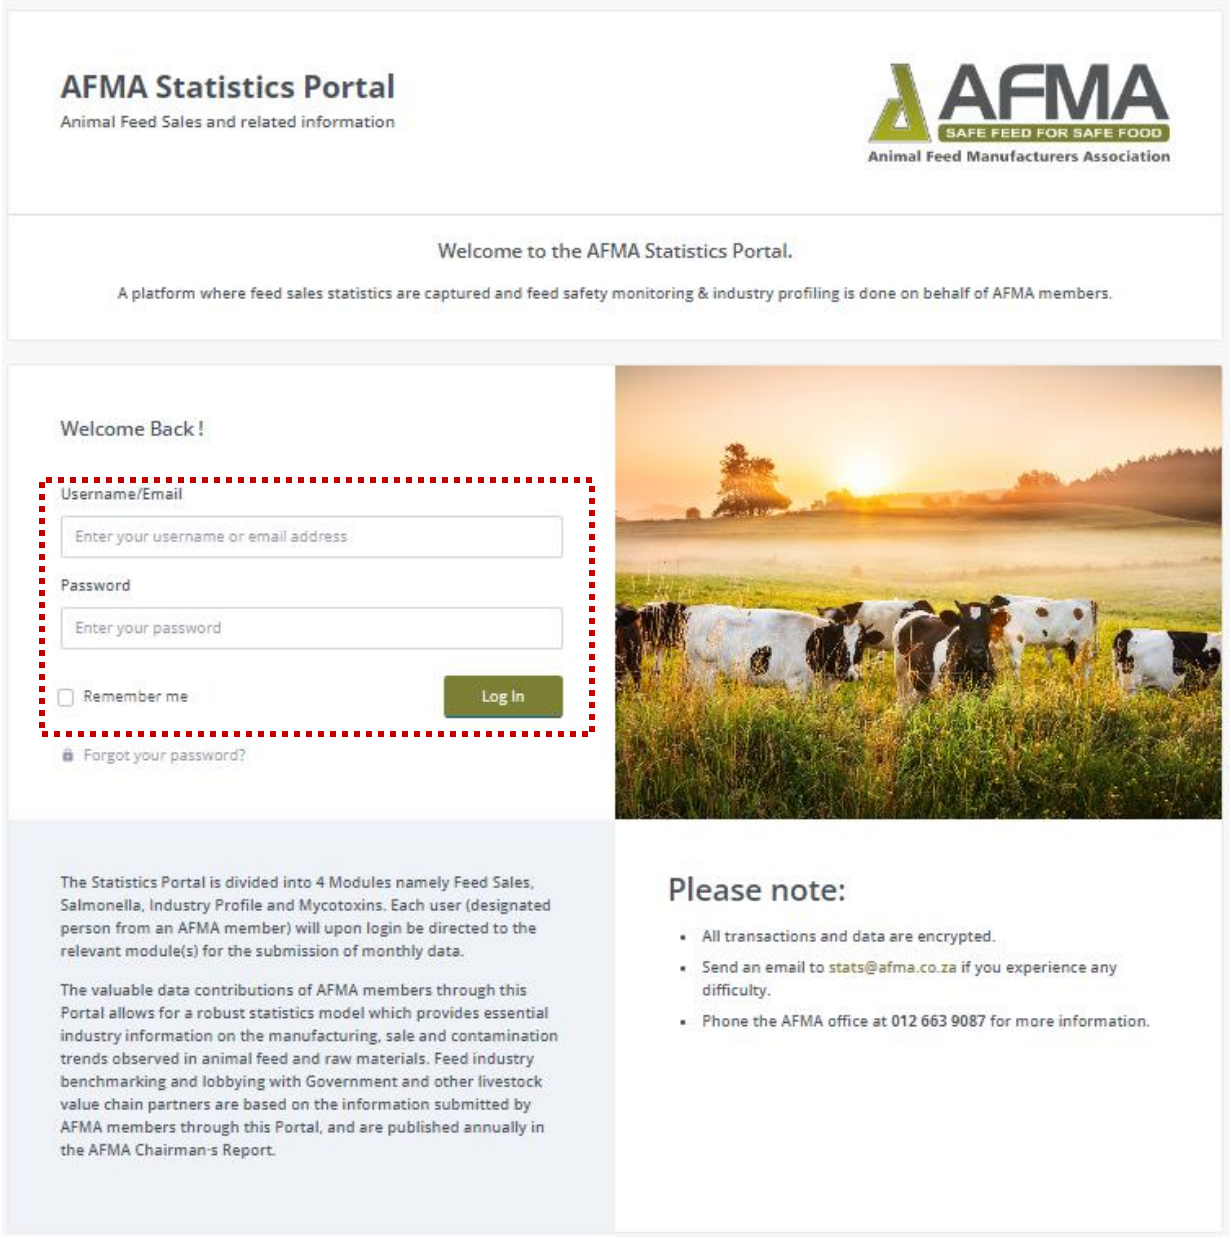

Figure 1: Log in to AFMA Stats system.

First-time users:

- Usernames will be provided by the system administrator at the AFMA Office.
- Once you have received your personalized username via email, log in using the following link: https://www.afmastats.co.za.
- The system will prompt the user to reset their password upon initial login.

Caution: Remember to keep your username and password safe.

Password requirements:

- Password must be 8 characters or more.
- Must contain at least 1 uppercase and 1 lowercase character.
- Must contain at least 1 number.
- Must contain at least 1 special character, e.g., $, * or &.
- Must not contain any spaces.

2.2 Reset a Password

The AFMA Stats system incorporates a self-service password management tool that enables users to independently reset their passwords.

Registered users of the AFMA Stats system can reset their passwords by selecting the **"Forgot password"** option (Figure 2). The system will automatically guide you through the password reset process. Please refer to section 2.1 for the specific password requirements.

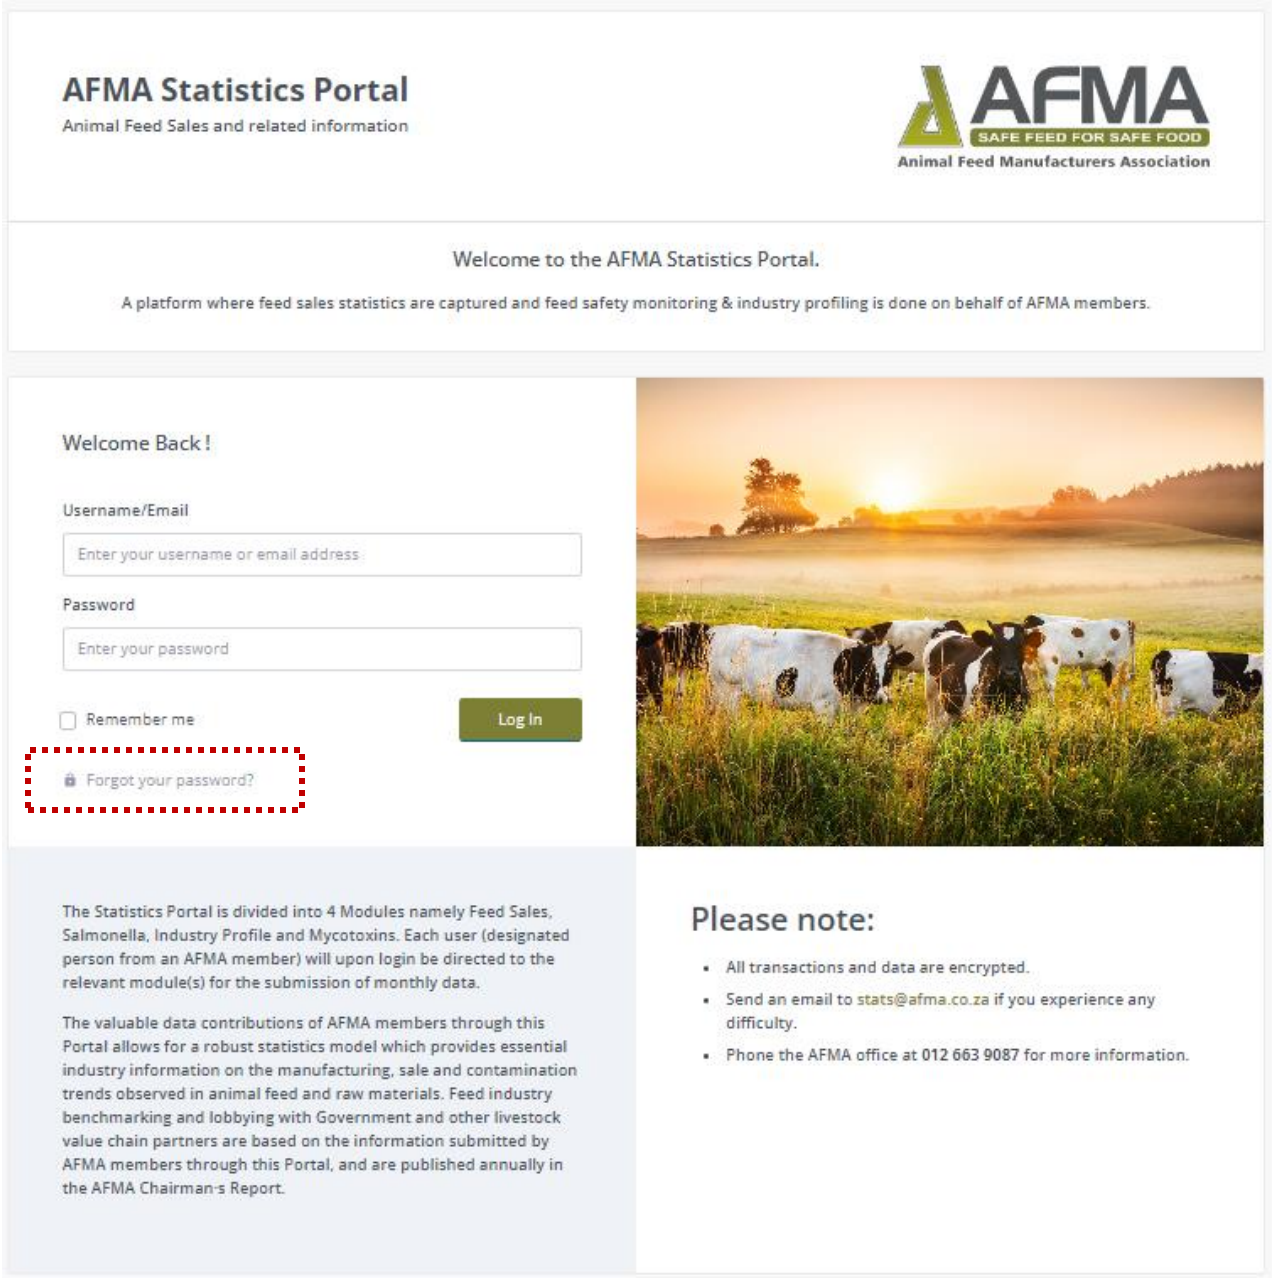

Figure 2: Reset AFMA Stats password.

2.3 System Organization & Navigation

On the dashboard of the AFMA Stats system, users can locate various modules. These modules include:

- Feed sales
- Industry Profile
- Salmonella

Please note that users will only be able to see and access the particular module(s) that has been activated for the user. The active modules will be displayed on the dashboard and left windowpane (Figure 3), allowing users to easily navigate between them within the AFMA Stats system.

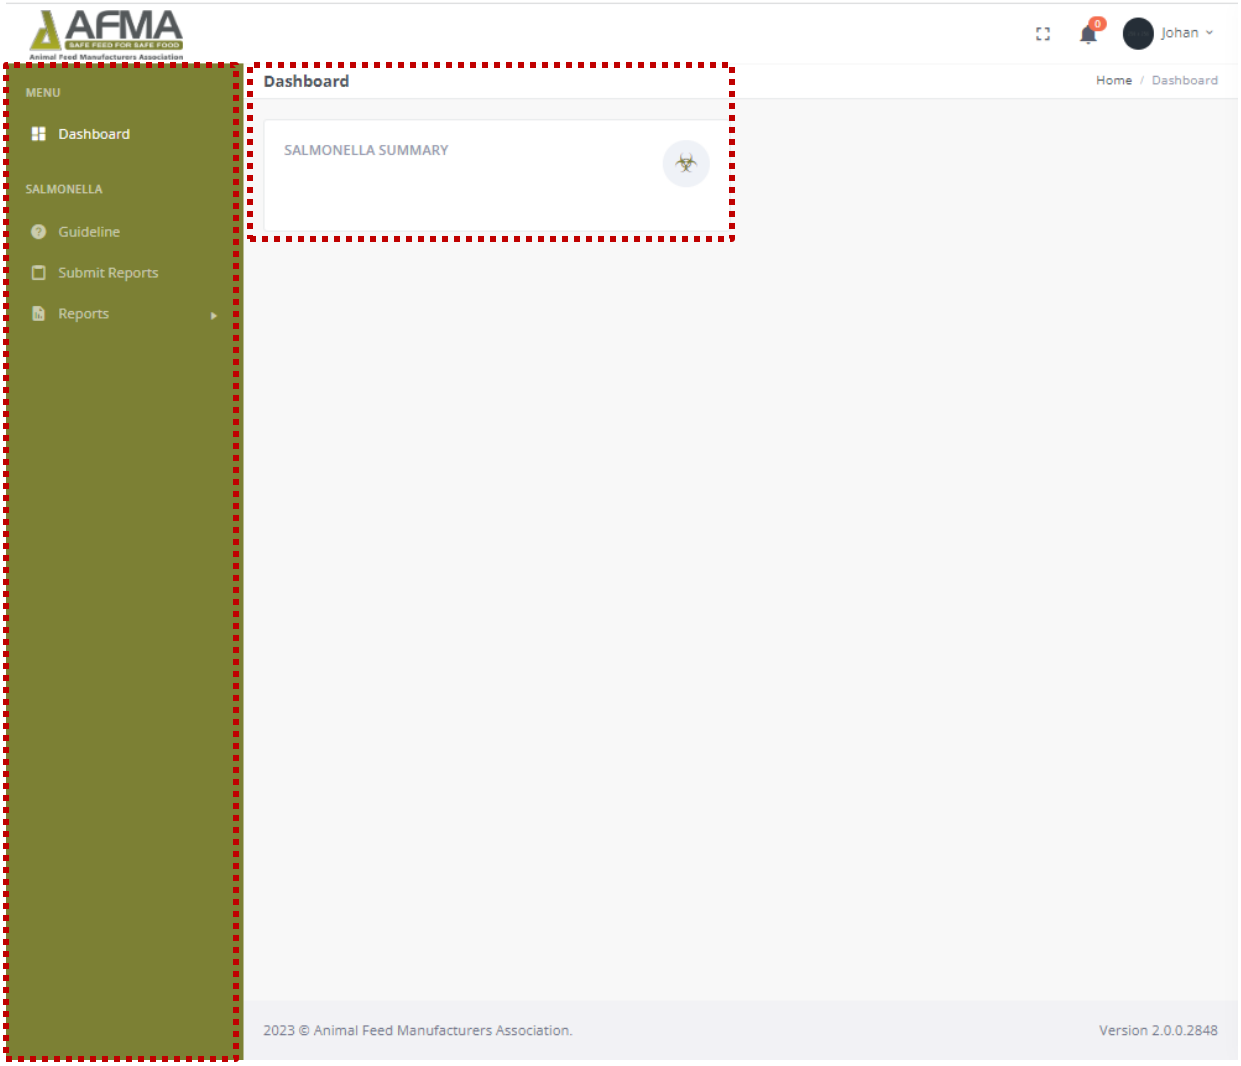

Figure 3: AFMA Stats system dashboard.

2.4 Exiting the System

To log out of the AFMA Stats system, simply click on your name located in the right-hand corner of the screen and select the **"Logout"** option (Figure 4).

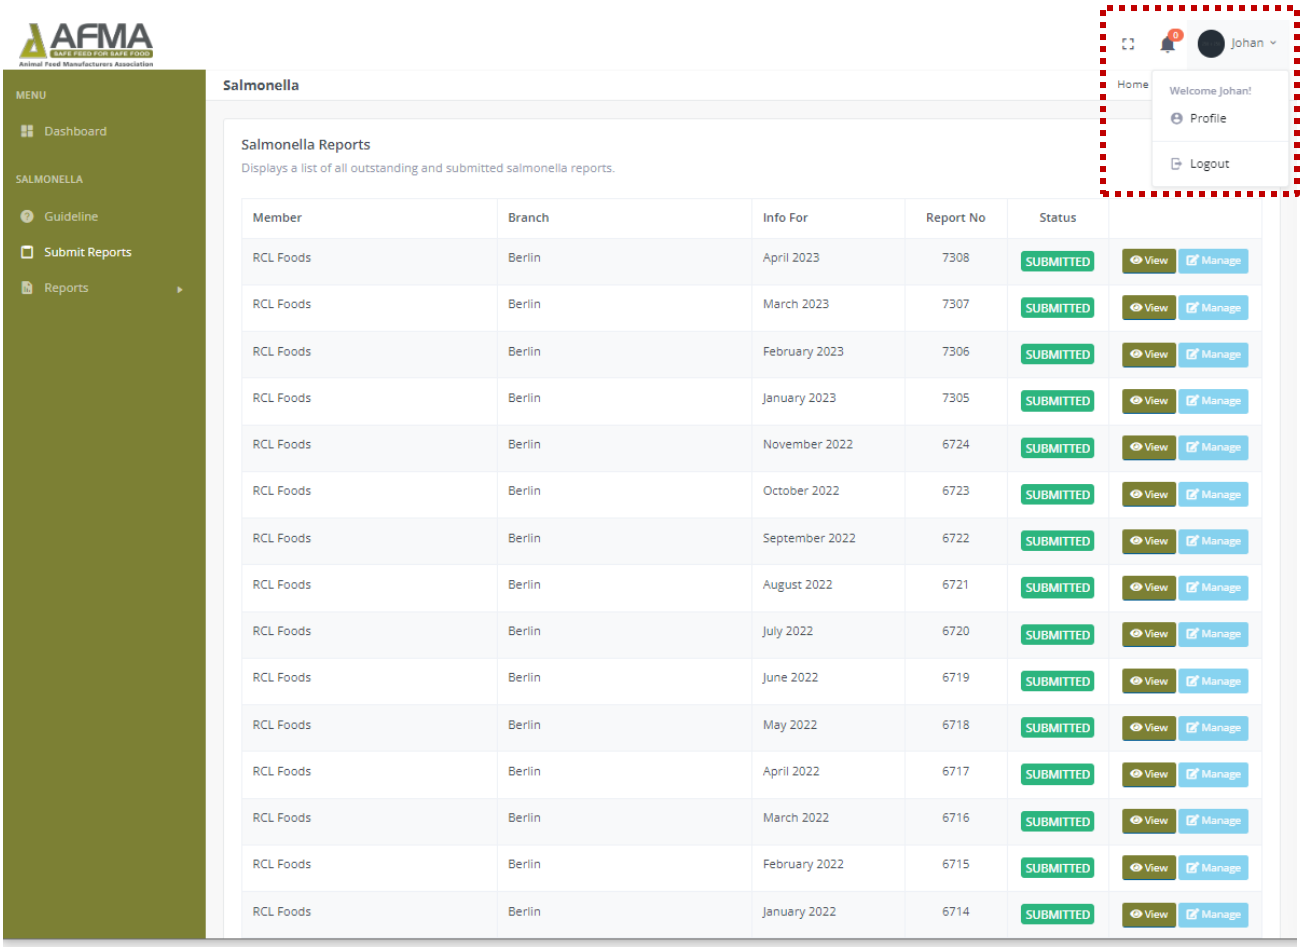

Figure 4: Logout of AFMA Stats system.

3. Reporting Timelines

3.1 When should I submit my Report?

The deadline to submit the monthly Salmonella report is on the **20th** of the following month (Table 1).

Table 1: Monthly reporting timeline.

Report	Submission date
January	20 February
February	20 March
March	20 April
April	20 May
May	20 June
June	20 July
July	20 August
August	20 September
September	20 October
October	20 November
November	20 December
December	20 January

It is important to note that only a single report should be submitted per month. If samples are collected more frequently during the month, it is necessary to consolidate the corresponding laboratory results into a single report. To ensure traceability, individual lab report numbers can be included in the report by separating them with a comma (,) or semi-colon (;). Please note that only one final sampling date is required when submitting the report.

3.2 Should I still submit my report even if I don't have any samples to include?

Users that don't have any samples to submit for Salmonella testing for a particular month are still required to submit their monthly salmonella report in the AFMA Stats system. In

the instance where there have no samples been analyzed for the month, members are requested to indicate that there are no samples to be submitted for that period. Refer to Figure 5 as an example. This allows for transparency and ensures that the absence of test results is properly documented.

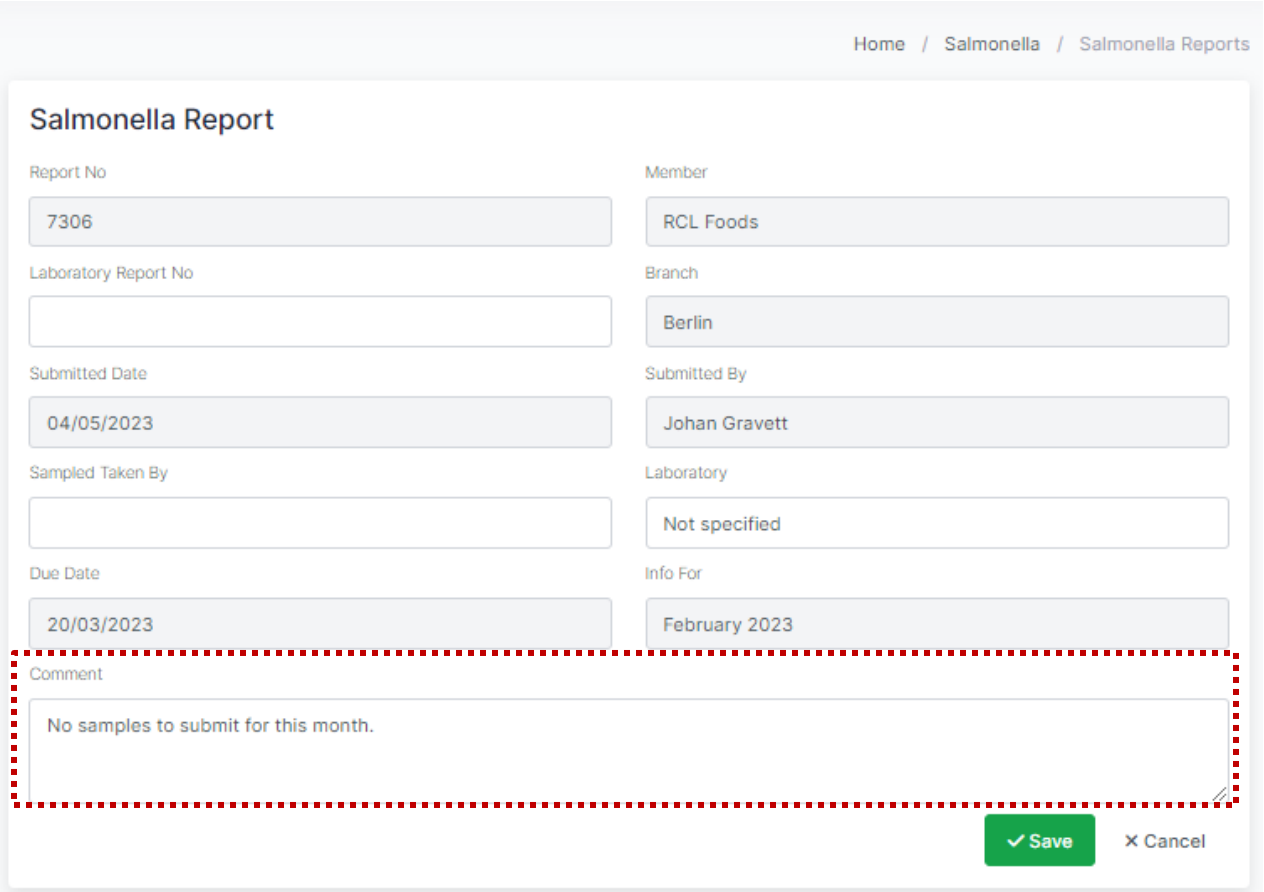

Figure 5: No samples to submit for this month.

4. Submit a Report

4.1 How to Submit a New Report

Follow the following steps to submit your monthly Salmonella report:

1. In the left navigation pane under the Salmonella module, click on **"Submit Reports".**

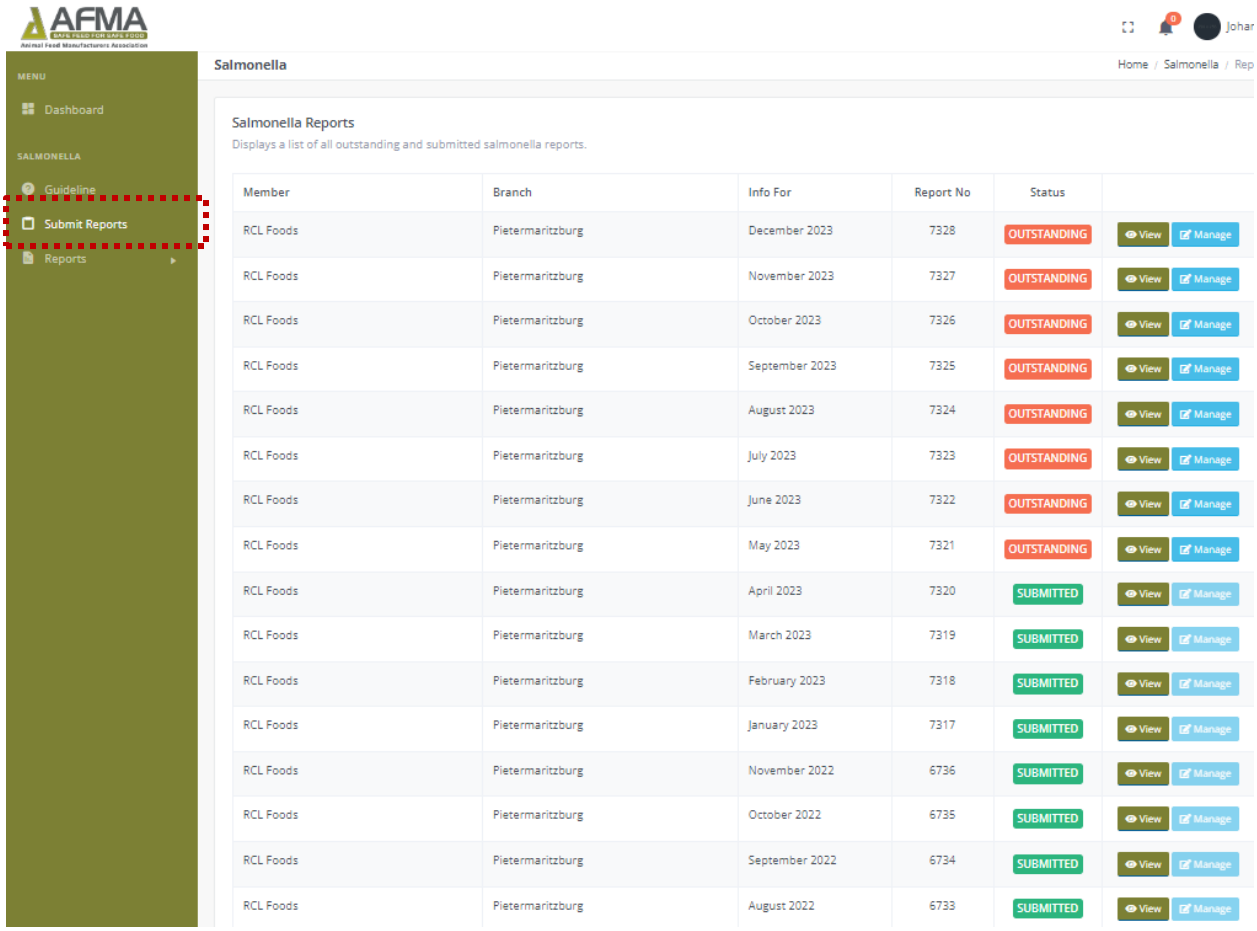

Figure 6: Submit a new Samlonella report.

2. Select the relevant month to complete (Outstanding).
3. Click on the **"Manage"** button to edit your monthly Salmonella report.

   NOTE: Submitted Salmonella reports cannot be edited by the user. Errors may, however, occur on submitted reports, and a request for correction should be submitted to the administrator via email (see section 4.2)

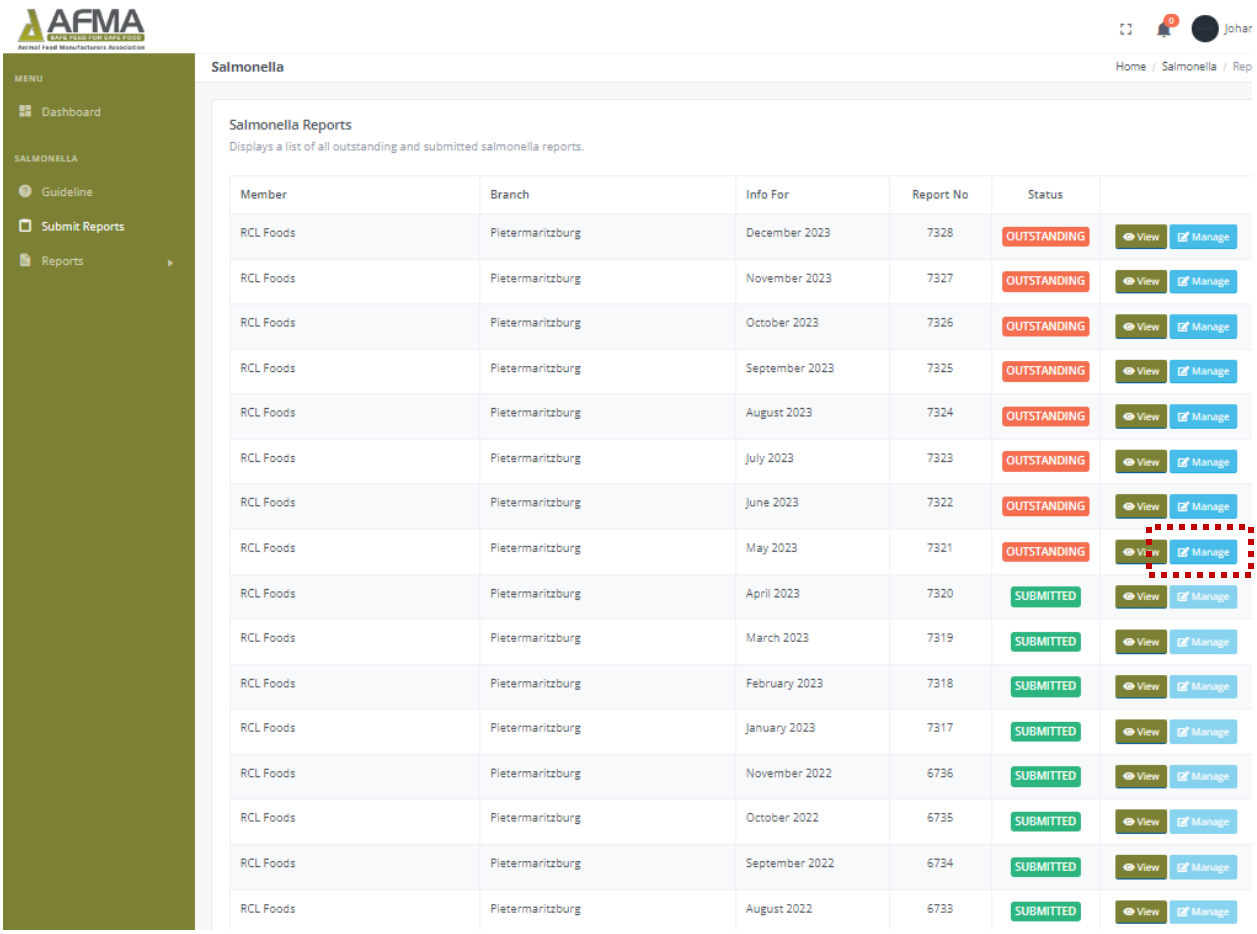

Figure 7: Edit new Salmonella report.

4. Click on the **"Edit"** button and edit the following fields *(where required):*
    - Laboratory Report No.
    - Sample Taken By
    - Laboratory
    - Comment

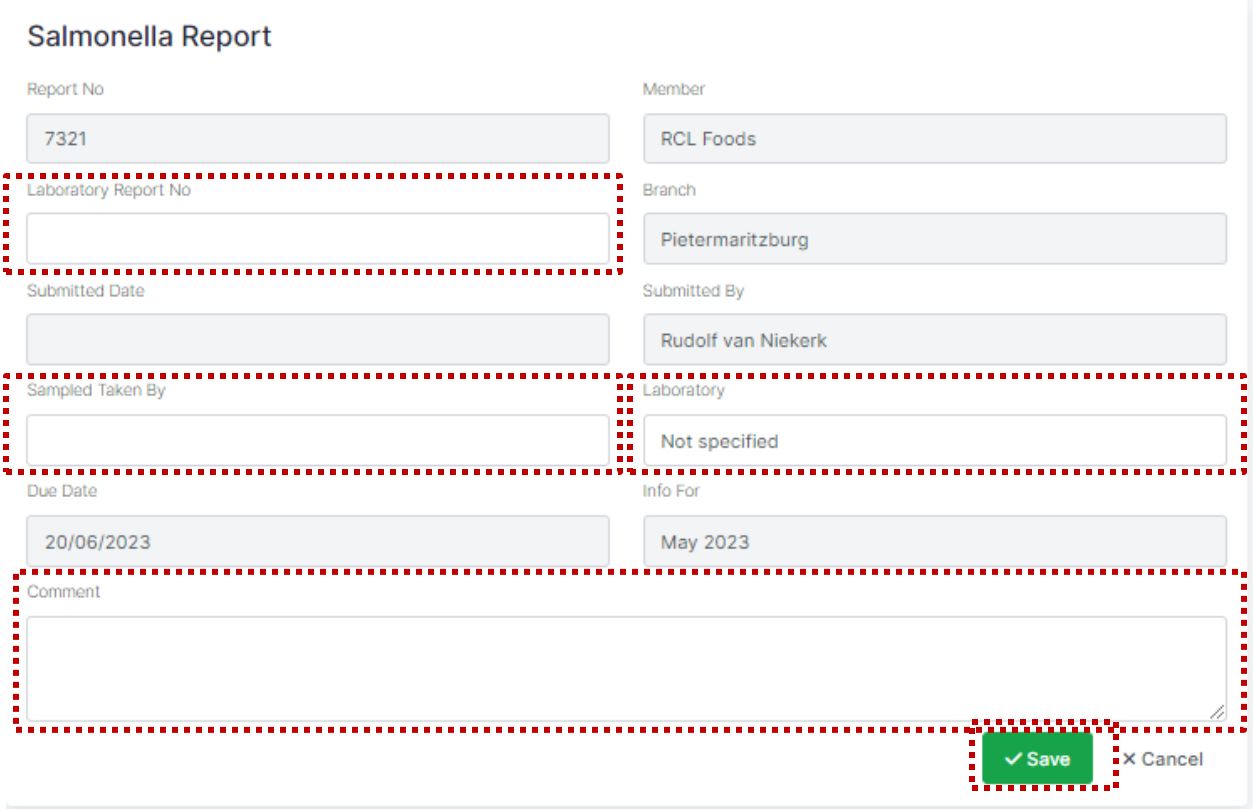

Figure 8: Edit relevant fields of the Salmonella report.

5. Click on the **"Save"** button to save the entered information.

6. To add a new sample, click on the **"Add New Sample"** button.

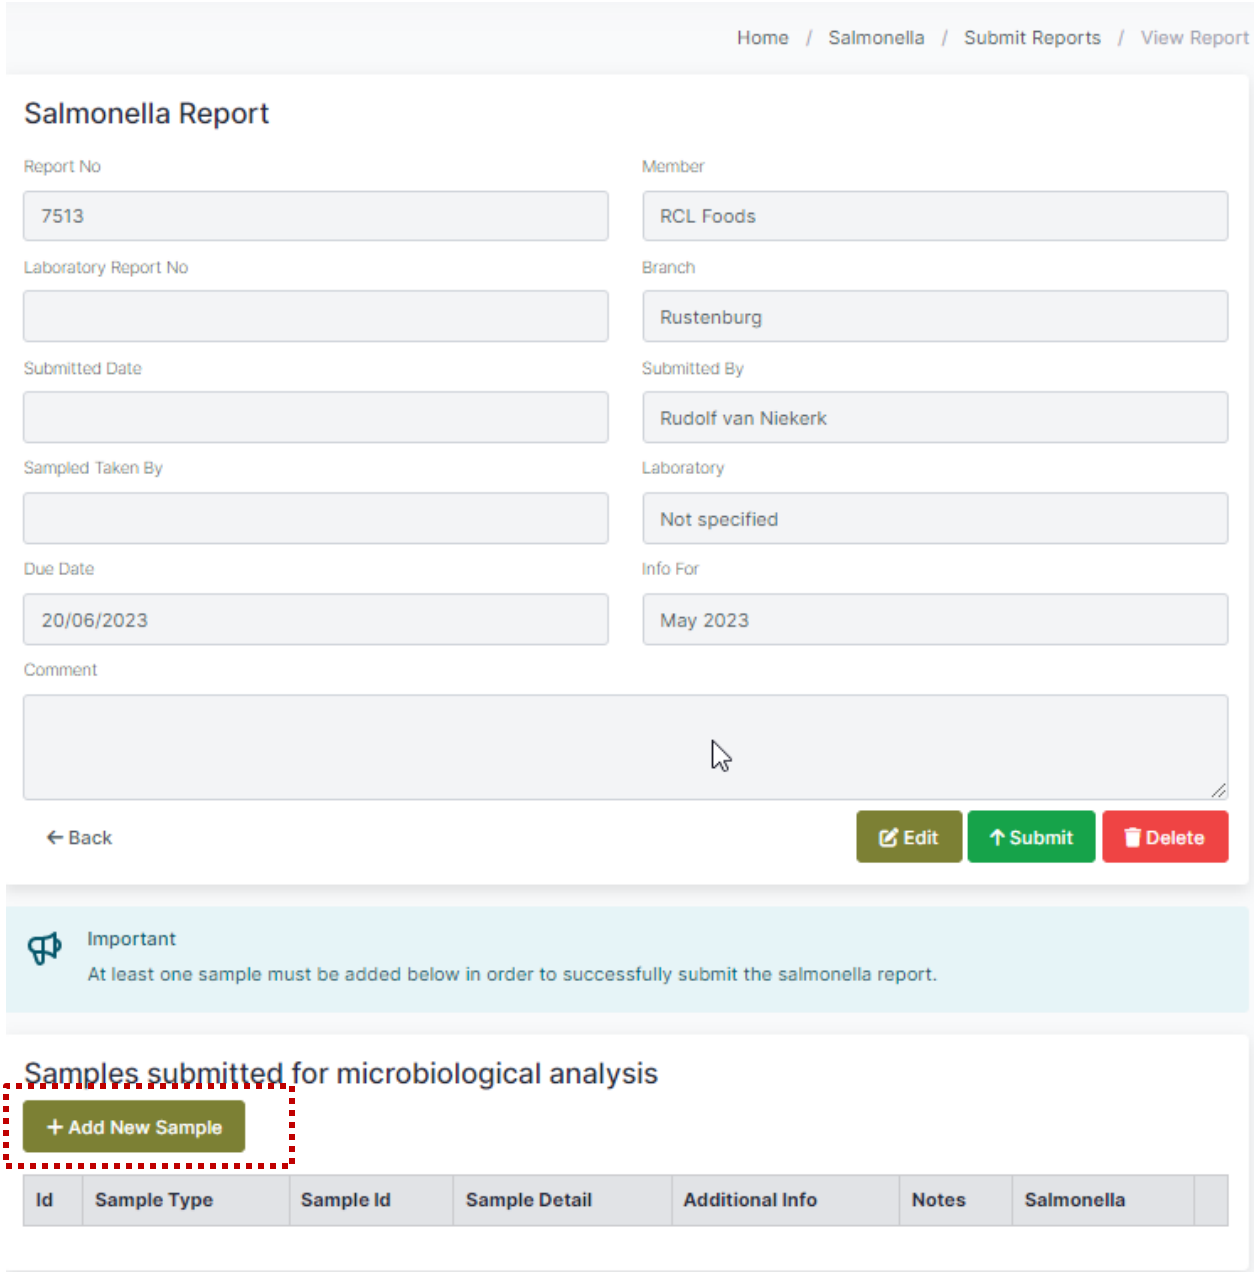

Figure 9: Add a new sample to the Salmonella report.

7. Select the relevant **"Sample Type"** as follows:
    - Dust Sample

      See the list of available Dust Sample Types in the AFMA Stats system in **Appendix B.**
    - Finished Product

      See the list of available Finished Products in the AFMA Stats system in **Appendix C.**

- Raw Material

  See the list of available Raw Materials in the AFMA Stats system in **Appendix D.**

8. To indicate the presence of Salmonella, click on the check mark icon. If Salmonella is detected, specify the exact **"Salmonella Type"** that was identified. In cases where Salmonella was not typed, simply select **"Salmonella Spp"** under the Salmonella type option. Finally, click on the **"Save"** button to save the information.

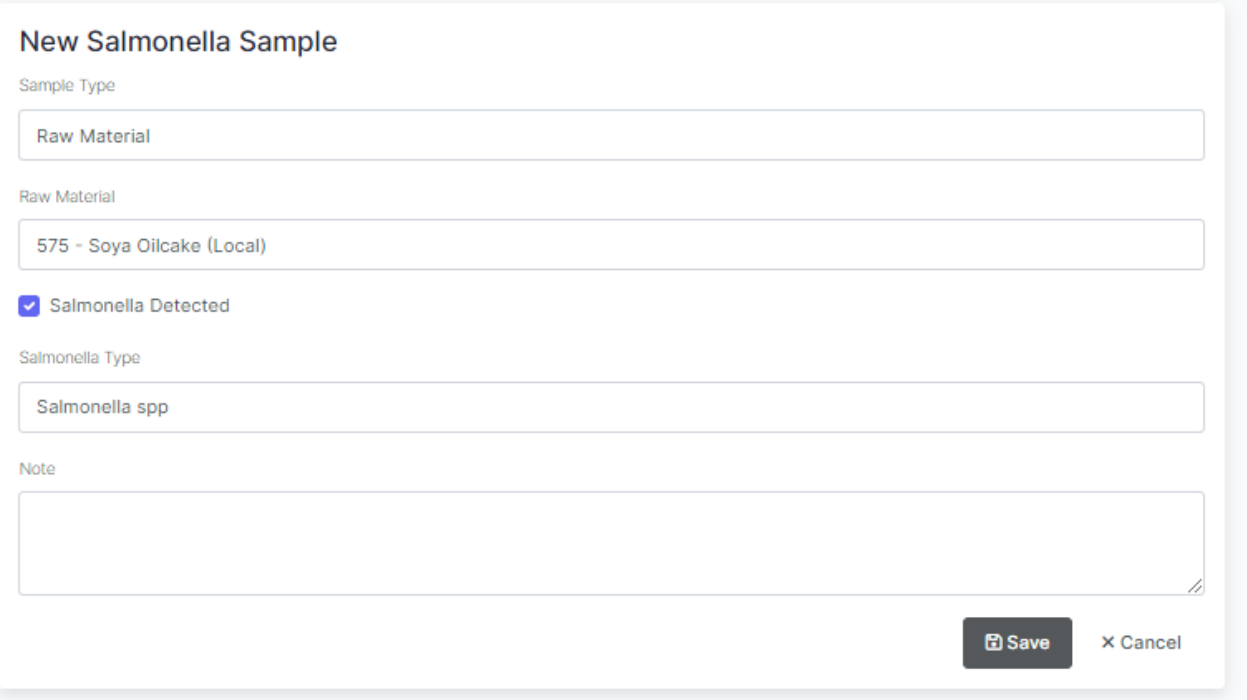

Figure 10: Identify the sample type and add relevant information.

9. Complete steps 1 to step 8 until all data for sample analyses have been recorded.

10. Once all data has been captured into the AFMA Stats system, click on the **"Submit"** button to submit the final Salmonella report.

4.2 Editing an existing Report

Please be aware that once the report has been submitted, the user cannot edit the report. If you have any inquiries or require assistance with changing a submitted Salmonella report, please contact stats@afma.co.za for further assistance.

4.3 Viewing an existing Report

To access and view an existing report, click on the **"View"** button.

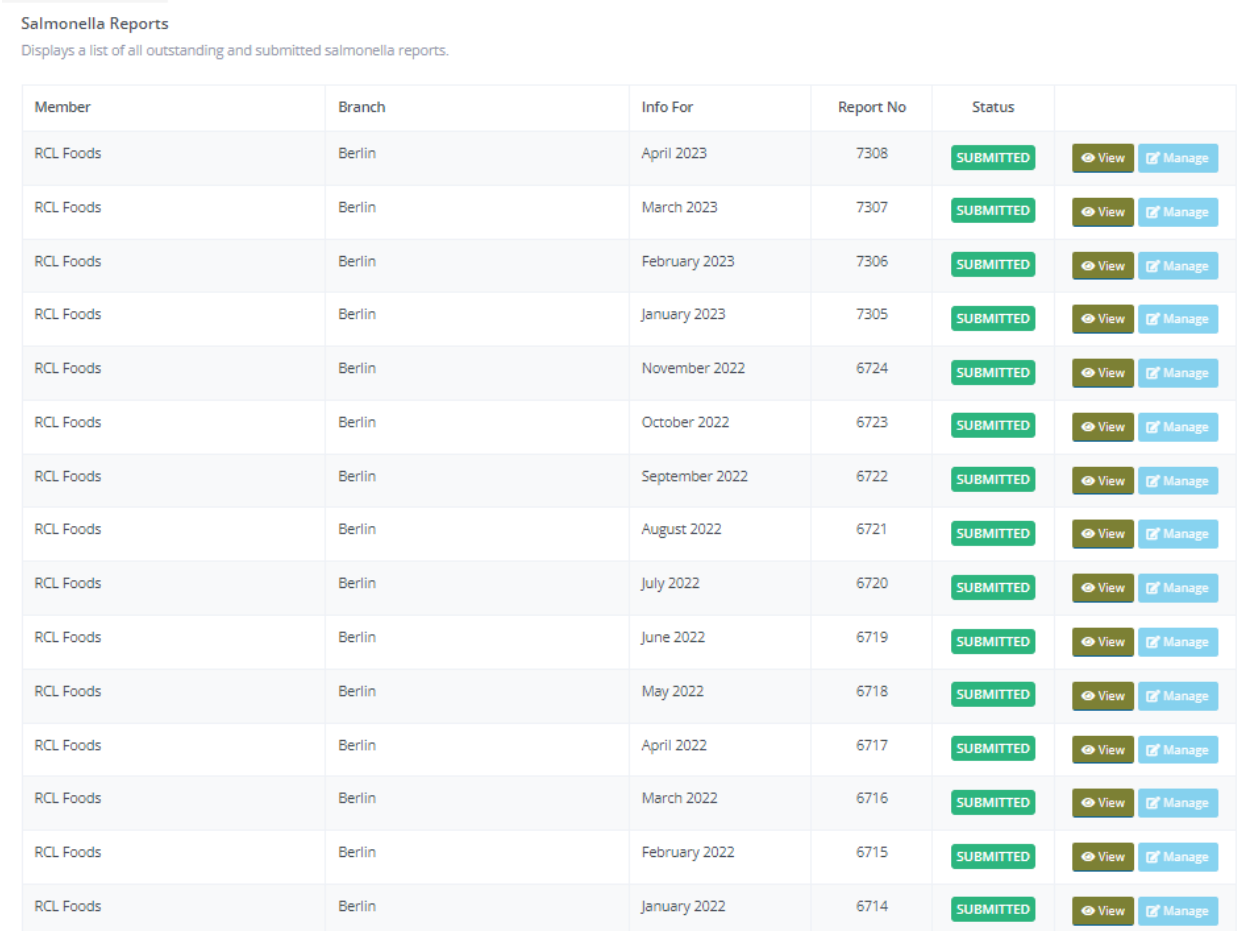

Figure 11: View an existing Salmonella report.

4.4 Report Status

Upon submission of the report, the status will change from **"Outstanding"** to **"Submitted".**

4.5 Salmonella Reports

4.5.1 User Reports

Users can generate an Excel report from the AFMA STATS System. To do so, select the desired start and end dates using the date picker. Then, click on the **"Export (Microsoft Excel)"** button to initiate the export of the report in Excel format.

4.5.2 Quarterly Industry Salmonella Report

Members participating in AFMA Feed Safety Salmonella monitoring will receive the quarterly industry Salmonella report for their internal use.

For any enquiries related to the quarterly industry Salmonella report please contact stats@afma.co.za for further assistance.

Caution: For internal use only - Not for distribution.

5. Troubleshooting and Support

5.1 Special Considerations and Recommendations

Users can make suggestions to add new or additional fields in the AFMA Stats system by motivating the following categories:

- Dust (Main & Sub Locations)
- Finished Products
- Raw Materials
- Salmonella Types

The AFMA Salmonella Sub-Committee (SC) will review these recommendations and will assess whether to incorporate the proposed changes suggested by the user. Special considerations or additional recommendations can be submitted to technical@afma.co.za.

5.2 Support

For any support or assistance with the AFMA Stats system, please refer to the relevant contact details below:
